## About Me

---

I am a highly motivated individual seeking a beginner role to develop my technical skills and contribute to the success of an organization. With my good problem solving skills and technical skills and I am confident to excel in technical role. Additionally, I am eager to learn and expand my skills that contribute to the company's growth.

## Academic Projects

---

### • Artificial intelligence chat bot system – AI

The chatbots are the computer programs that use Natural Language to interact with users. In this I used **python** and created a chatbot for medical purposes that can diagnose the disease and provide details before consulting a doctor.

### • Online Toll payment system – Java

I have created a portal using **java** language that accepts the toll payments ahead of their journey and that reflects in our system. So that it is easy for people to move fast and make their journey successful.

### • Personal Portfolio – *Html, Css, Java Script*

I have created a basic personal portfolio which contains all the details included in it using **html, css, javascript**. I have developed the front end part of it.

## Certifications

---

- Microsoft Certified : Azure Fundamentals  
Issued by Microsoft.
- Got a certificate by participating in club events in college.
